

Liberal & Labor?

Two sides of the same coin!

The only real difference between the two major parties is their names.

It doesn't matter which side is in government or opposition because they are secure in the knowledge that whoever is in power will carry on with the same old agenda: "Sorry Day", the Republic, Multiculturalism and mass immigration.

Neither "side" see Australia as a nation populated by a people with a common identity; rather, they see Australia as an economic entity populated with units of production. They do not care where these units of production come from, they don't care who does the work, as long as the bottom line keeps growing.

Importing millions from Asia etc.

The Labor Party want to import millions of cheap labourers from the Third World as a way to dampen wage demands in Australia. Big business want the teeming millions of Asia, and from the Pacific Islands, etc., to migrate here to provide a cheap source of labour and an ever-growing consumer base. This money-grabbing tactic will damage the Australian way of life.

Hard times ahead

The fact is that we are heading into harder times, something the government does not want to admit. We know that the threat of unemployment has risen dramatically, yet the Rudd government continues to import the teeming masses of the Third World. It won't just be your kids who'll be competing against these cheap imports for work, it will be you!

The Australian Protectionist Party isn't interested in keeping the "bastards honest", like the Democrats pretended to, we want to "kick the bastards out". The Australian Protectionist Party will rebuild Australian manufacturing. The Australian Protectionist Party will pay our farmers to stay on the land, not pay them to leave it!

Let's show the Liberal-Labor politicians that we are no longer going to take their dictatorial and nation-destroying policies anymore.

Let's fight back! Join the APP.
