

Stop African crime on our streets

The brutal bashing of a defenceless young man by a gang of young African men, has once again highlighted the problems of crime associated with the immigration of large numbers of Africans into Australia.

Professor Andrew Fraser warned us about these dangers. *“Experience practically everywhere in the world tells us that an expanding black population is a sure fire recipe for increases in crime, violence and a wide range of other social problems.”*

Whilst every society, ethnic group and race all have a percentage of people that commit violent crimes, research shows that this percentage is significantly higher amongst African males. This does **not** mean that all of them are violent criminals but, compared to the general population, the sad fact is that a higher percentage of African males are more likely to commit crimes of violence. This is shown by crime studies and statistics in Australia, England and the USA.

Liberal-Labor governments have shown their contempt for the Australian people by pursuing the discredited and failed policy of multiculturalism by continuing to bring in people from cultures and societies that are often so different to ours that

many find it very hard to fit in, leading to anger, depression and social conflict.

This is not a matter of faceless statistics, but of real people suffering as victims of crime. These higher crime statistics could mean your brother is bashed, your sister is raped, your mother is robbed, or your friend is murdered. **Higher crime rates are about actual real people.**

If **you** were going to run a sensible immigration programme, would you choose people from European countries with low crime rates (and who can easily fit in) or would you choose people from African countries with high crime rates?

The fact is that **political multiculturalists are extremists**, who are equally as guilty as the perpetrators of these crimes. They would prefer countless more Australians be robbed, assaulted, raped or murdered than admit their error and reverse their immigration policy.

It is the politicians and multiculturalists who are to blame, pushing their narrow minded and dictatorial ideology upon the rest of us. To protect future generations, we must throw out the extremist ideologies of political multiculturalism and political correctness. It is time that we started to protect Australians – and safeguard our nation’s future.
